

Targeted consultation to the stakeholders on the De minimis Regulation

Fields marked with * are mandatory.

Introduction

In 2012, the Commission launched the State aid modernization (SAM) with the objectives to: 1) foster sustainable, smart and inclusive growth in a competitive internal market; 2) focus Commission's ex ante scrutiny on cases with the biggest impact on the internal market; and 3) streamline the rules and provide for faster decisions. In view of these objectives, the Commission has revised a number of State aid rules, including the Commission Regulation (EU) No 1407/2013 of 18 December 2013 on the application of Articles 107 and 108 of the Treaty on the Functioning of the European Union to de minimis aid (hereinafter "De minimis Regulation").

In January 2019, the European Commission announced its intention to prolong seven sets of State aid rules for a period of two years[1] and launched a [comprehensive policy evaluation in the area of State aid \("fitness check"\)](#). The aim is to verify the extent to which the objectives of the SAM have been reached, whether there is scope for further updating of the rules in view of the EU priorities under the new Multiannual financial framework, new EU legislation or developments on the internal and global market. Part of this exercise is the evaluation of the De minimis Regulation in order to assess whether the current rules are still fit for purpose.

Besides the general public consultation on the fitness check of EU State aid rules, this targeted consultation aims at asking supplementary questions in order to gather stakeholders' views on the implementation of the De minimis Regulation and receiving insights about potential gaps, overlaps or excessive regulatory burden. The main target group of this questionnaire are actual or potential recipients of de minimis aid and their competitors.

You are kindly invited to reply to a set of 14 questions. Please make sure that you use the save button as you proceed with the questionnaire to avoid losing information that was already inserted - especially in the case of questions with open replies. At the end of the survey you will have an opportunity to provide broader, more general comments and to upload documents, which you consider to be relevant.

The Commission will publish an analysis of the results of the fitness check and examine possible follow up actions at the beginning of 2020.

Thank you for participating in this consultation.
